

OLD WORLD SLATE

Victorian/Atlantic Blend

BRAVA'S Old World Slate offers the timeless elegance of a traditional European slate in a durable yet lightweight, synthetic material, making it ideal for installation on existing homes and buildings, as well as new construction. At 1" thick, BRAVA'S Old World Slate is the thickest synthetic slate product on the market. Combine that with BRAVA'S patent-protected coloration process which replicates the look of authentic mineral veining traditionally found in natural slate, and the result is a beautiful BRAVA Slate roof that is virtually indistinguishable from its expensive, natural counterpart.

- > **AUTHENTIC LOOK** - BRAVA's products are the end result of a painstakingly detailed engineering process undertaken by the Design Team at BRAVA Roof Tile, the goal of which was to create a synthetic roof tile so authentic in its look that no one could tell the difference when placed side-by-side with its natural counterparts – even up close.
- > **LONG-LASTING PERFORMANCE** – backed by a 50-year limited warranty, BRAVA is designed to withstand even the most severe weather, boasting a Class 4 impact resistance rating (the highest hail performance certification recognized in the industry), Miami Dade approval, wind protection in excess of 110 MPH and either Class C or Class A fire rating.
- > **ENHANCED CURB APPEAL** – the curb appeal of a property directly correlates with owner satisfaction and higher property value, and few features can add to curb appeal like the aesthetics of a gorgeous Slate roof.
- > **EASE OF INSTALL** – at only 339 pounds per square, BRAVA Old World Slate allows for easy installation without the need for costly structural modifications or special installation techniques.
- > **COLOR TECHNOLOGY** – BRAVA'S proprietary multi-coloring process means you get the authentic appearance of a natural product, complete with variegated colors throughout the entire product. Thanks to its patent-protected coloration process, BRAVA turns any color you can imagine into a reality for your custom roof – with the help of BRAVA's Design Team, the possibilities are truly limitless.
- > **DURABLE** – BRAVA's proprietary formulation ensures virtually no breakage. This extreme durability surpasses that of its natural counterparts where breakage in shipping and installation can be a very costly concern.
- > **ENVIRONMENTALLY FRIENDLY** – Made in the USA, BRAVA uses recycled material to create a beautiful and durable roof that itself is fully recyclable.
- > **COMPLETE** – BRAVA's full line of accessory tiles (including Solids for valleys and gables) make it the most complete and authentic synthetic roof system on the market.
